

LCD Monitor Well

The 15" LCD monitor shown here fits neatly into our well area. The entire screen is visible and the monitor controls are also accessible. The standard size will house most 15" LCD monitors with swivel bases. The well may be resized for larger monitors based on the availability of additional space.

Another option for housing your LCD monitor. Our well area allows the use of various models within the same size range. The monitor neatly sits in the well area and is easily viewed. The work surface angle is set at about 20 degrees around the monitor.
