

SERIES III REFERENCE MONITORS

KSI's Series III Reference Monitor Loudspeakers employ the latest technology required by today's high end digital audio systems. Superior sound quality, spatial detail and imaging are but a few of the reasons **KSI Reference Monitors** are regarded among the finest. From critical studio monitoring to high end home theaters, **KSI Reference Monitors** offer unbelievable performance at any price.

All bass midrange transducers feature extra large voice coils and highly efficient magnet structures. The produces a transducer capable of high power capacity and very wide dynamic range. Our 28mm fabric dome high frequency transducers feature a vented magnet structure with ferro fluid cooling for very smooth high frequency reproduction. Our crossovers utilize very low tolerance components for inaudible transitions at the crossover point, and our cabinets are so tight and heavily braced that buzzes and rattles are unheard of.

KSI Series III Reference Monitor Loudspeakers can be found only in the finest installations. Let's make sure yours will be the next.
