Our ESL Equipment Racks are designed for housing small or large amounts of electronic equipment. Sizes from 6 to 40 spaces are offered and front and rear locking doors and recessed casters are standard. We recommend that heavy equipment be placed at the bottom of the rack to avoid tipping over. Thirty day shipment is available. Select either standard red oak or maple with KSI clear natural finish, or one of our Optional Premier finishes as shown on page 24. (Additional charges apply.)
