

KSI's Plasma lift cabinet

This cabinet features a flip-down front panel, recessed swivel casters, and inset revealed panels. Gas cylinders make the top easy to lift. The finish is natural plain sliced cherry.

A superb way to house your flat screen monitor. This piece features our detail molding for a traditional look. The electric lift safely raises the plasma screen to the proper height via the top mounted push button controls. Cherry with our dark cherry finish is the perfect choice. All KSI styles and finishes are available in this product. The plasma screen shown in this cabinet is a 42" screen.

We can modify this piece to suit your personal requirements
